MUHAMMAD FURQAN

Full Stack Developer | Java & Spring Boot | AI/ML Integration

+92 327 5144926 | mfurqanch.dev@gmail.com | Linked In | GitHub

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building end-to-end web applications combining Java/Spring Boot and Python/Flask, including integration of machine learning models into production-ready systems. Adept at database design, secure authentication, and delivering complete, real-world solutions from backend to frontend.

EDUCATION

Bachelor of Science in Computer Science **2022 – 2026**
International Islamic University, Islamabad

EXPERIENCE

Full-Stack Developer (Intern) June 2024 – Sept 2024

Zad Technology – Johar Town, Lahore

- Built responsive frontend interfaces using **HTML, CSS, Thymeleaf** integrating REST APIs for user registration, profile management, and matchmaking features.
- Developed backend services with **Spring Boot**, handling authentication, data validation, and MySQL database operations.

Full-Stack Developer June 2025 – Sept 2025

Zad Technology – Johar Town, Lahore

- Built and maintained scalable web applications using the (**Spring Boot, REST APIs, Flask, JWT, MySQL**) developing reusable components.
- Implemented advanced features like semantic search, document chunking, and real-time data handling, improving system performance and user experience.

PROJECTS

AI-Powered Student Academic Advisor System (Final Year Project)

Full-stack AI advisory platform for academic risk prediction, classification, and transcript analysis

- Built a full-stack advisory platform that predicts academic risk (Low/Medium/High) and classifies students by CGPA, attendance, and failed subjects using Random Forest and Logistic Regression.
- Developed an AI Transcript Analyzer to detect weak, failed, and problematic courses and generate structured reports with performance insights and personalized study recommendations.
- Implemented JWT-based authentication with role-based access control for Student and Admin roles.
- Built a recommendation engine and analytics dashboard to support academic decision-making.

E-Commerce Store & Admin Portal

Full-stack e-commerce platform with a dedicated admin management portal

- Built a full-stack e-commerce application for product browsing, cart management, and checkout, with a separate Admin Portal for managing products, orders, and users.
- Developed RESTful APIs in Java/Spring Boot and server-rendered frontend pages using Thymeleaf, HTML, and CSS.
- Designed a relational MySQL schema for product, order, and user data.
- Implemented secure authentication and role-based authorization for user and admin workflows.

TECHNICAL SKILLS

- **Backend:** Spring Boot, REST APIs, Flask, JWT Authentication
- **Frontend:** HTML, TailwindCSS, Bootstrap, JavaScript, Thymeleaf
- **Databases:** MySQL, SQL, PostgreSQL
- **Developer Tools**: Git, GitHub, Vercel, AWS, Railway, Codex
- **AI / Machine Learning:** Scikit-learn, Random Forest, Logistic Regression
